Let 's say the 6th grade class is selling raffle tickets at a price of \$ 6 for 5 tickets. Some students may use diagrams with shapes to represent the situation. For example, here is a diagram representing 10 tickets for \$ 12. Drawing so many shapes becomes impractical. Double number line diagrams are easier to work with.

Based on these results, estimate the probability that 3 or more kicks are made. There is a bag of 50 marbles. Andre takes out a marble, records its color, and puts it back in. In 4 trials, he gets a green marble 1 time. Jada takes out a marble, records its color, and puts it back in. In 12 trials, she gets a green marble 5 times.

Grade 7 Mathematics NC, Unit 8.8 - Open Up Resources

Which of these scales are equivalent to 3 cm to 4 km? Select all that apply. Recall that 1 inch is 2.54 centimeters, 0.75 cm to 1 km, 1 cm to 12 km, 6 mm to 2 km, 0.3 mm to 40 m, 1 inch to 7.62 km. These two triangles are scaled copies of one another. The area of the smaller triangle is 9 square units. What is the area of the larger triangle?

The first books to present specific guidance for teaching the Common Core State Standards Forty-three states plus the District of Columbia and the U.S. Virgin Islands have signed on to adopt the Common Core State Standards (CCSS). The need for curriculum guides to assist teachers in helping students meet these standards has become imperative. Created by teachers, for teachers, the research-based curriculum maps in this book present a comprehensive, coherent sequence of thematic units for teaching the skills outlined in the CCSS for English language arts in Grades 9-12. Teachers can use the maps to plan their year and craft their own more detailed lesson plans. Each grade is broken down into six units that include focus standards, suggested works, sample activities and assessments, lesson plans, and more The maps address every standard in the CCSS, yet are flexible and adaptable to accommodate diverse teaching styles Any teacher, school, or district that chooses to follow the Common Core maps can be confident that they are adhering to the standards.

Maximize your mathematics curriculum to challenge all students This collection of lessons from experienced teachers provides multifaceted examples of rigorous learning opportunities for mathematics students in Grades 6 – 12. The four sample units focus on fractions, linear programming, geometry, and quadratic relationships. The authors provide user-friendly methods for instruction and demonstrate how to differentiate the lessons for the benefit of all students. Included are standards-based strategies that guide students through: Understanding secondary mathematics concepts Discovering connections between mathematics and other subjects Developing critical thinking skills Connecting mathematics learning to society through the study of real-world data, proportional reasoning, and problem solving

Build essential skills while having fun with Home Workbooks! Now updated with fun, colorful pages and engaging art, each book measures 7" x 9.25" and is filled with 64 pages of age-appropriate activities, puzzles, and games. These teacher-approved books are perfect for home, school, summer breaks, and road trips! Skills covered include beginning reading and phonics, beginning writing, one- and two-digit addition and subtraction, graphing and measurement, and more! An incentive chart and 140 full-color stickers are also included to help parents or teachers track student progress. Home Workbooks are available for prekindergarten through grade 3 students, and feature titles in a wide variety of skill areas to suit any need.

Give students the tools they need to get a job. Prepare students with tips on filling out a job application and writing a resume. Get to know what kind of questions to expect at an interview and how to prepare for them. Gain the skills needed to thrive on the job and properly communicate with peers and supervisors. Find out the benefits of volunteering and know what your rights are as employees. Comprised of reading passages, graphic organizers, real-world activities, crossword, word search and comprehension quiz, our resource combines high interest concepts with low vocabulary to ensure all learners comprehend the essential skills required in life. All of our content is reproducible and aligned to your State Standards and are written to Bloom's Taxonomy.

Familiarize students in grade 3 with the format and language of standardized tests using Preparing Students for Standardized Testing. This 128-page book is organized in a clear, concise way so that the lessons and tips build students' confidence and practice tests support skill reinforcement. This book covers topics such as vocabulary, language mechanics and comprehension, math computation and problem solving, scientific process, history and culture, government, and geography. The book includes reproducible and an answer key.

Josey-Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts (ELA) curriculum and professional development resources for grades 6 – 12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences the standards require, Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies and other classroom resources. Paths to College and Career is a concrete and practical ELA instructional program that engages students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6 – 12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes: Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation.
