ICAO/IATA Dangerous Goods Training - Daniels Training Services
Recognised by airlines worldwide, the IATA Dangerous Goods Regulations (DGR) is the industry standard for shipping dangerous goods by air. Therefore, It is the most complete, up-to-date and user-friendly reference manual trusted by the industry for over 60 years.

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

The International Maritime Dangerous Goods Code is the standard guide to all aspects of handling dangerous goods and marine pollutants in sea transport. The Code lays down basic principles: detailed recommendations for individual substances, materials and articles, and a number of recommendations for good operational practice, including advice on terminology, packing, labelling, stowage, segregation and handling, and emergency response action. The Code has undergone many changes over the years, in both format and content, in order to keep up with the rapid expansion of the shipping industry. Amendment 40-20 includes revisions to various sections of the Code and to transport requirements for specific substances. It is mandatory as from 1 June 2022 but may be applied by Administrations in whole or in part on a voluntary basis from 1 January 2021

This document provides guidance to States and operators for developing procedures and policies for dealing with dangerous goods incidents on board aircraft. It contains general information on the factors that may need to be considered when dealing with any dangerous goods incident and provides specific emergency response drill codes for each item listed in the Technical Instructions for the Safe Transport of Dangerous Goods by Air

This document is issued in accordance with regulation 11(3) of the Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 as amended (CDG 2009); regulation 8(3) of the Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations (Northern Ireland) 2010 as amended (CDG 2010) and regulation 12(3) of the Carriage of Explosives Regulations (Northern Ireland) 2010 (CE 2010). It sets out the circumstances under which particular types of carriage or carriage in particular circumstances are exempt from requirements and prohibitions arising under those regulations. It also provides for alternative requirements and prohibitions to apply.

This is an amendment to the 4th revised edition of the manual (2004, ISBN 9211390877) which sets out the UN schemes for the classification of certain types of dangerous goods and gives descriptions of the test methods and procedures for the classification of substances and articles for transport.

The IATA Dangerous Goods Regulations (DGR) Manual gives procedures for the shipper and the operator by which articles and substances with hazardous properties can be safely transported by air on all commercial air transport. It provides all provisions mandated by ICAO, and all rules agreed by airlines for safely handling of dangerous goods. The 45th edition of the DGR introduces changes and improvements to the Regulations, including corrections and amendments advised by the International Civil Aviation Organization (ICAO) to the Technical Instructions, updates to State and operator variations. This year, in recognition of the forthcoming changes to the requirements for infectious substances and diagnostic specimens, the DGR has an additional appendix detailing the changes made by the United Nations.It also incorporates all amendments made by the Dangerous Goods Board and includes changes advised by ICAO to the 2003-2004 Edition of the ICAO Technical Instructions.
