of information ...

•Instructions for use (or instructions) were used in IEC 62079 and IEC 82079-1 Ed. 1 for contents not only addressing and covering activities or operations to be performed. Instructions for use always also comprised information describing the product, or reference material. •‘instructions’ was always too limited and kind of misleading.

The contributions in this volume set out to understand and map parts of the vast territory of specialized communication that have yet to be charted from a research perspective. Specific aspects from the fields of translation studies, technical communication and accessibility are explored from different perspectives bringing new insights into how we conceptualize the practice of technical writing and translation. The findings of this expedition are of interest to researchers, practitioners and students of specialized communication.

The EN ISO 13849-1 standard, "Safety of machinery - Safety-related parts of control systems", contains provisions governing the design of such parts. This report is an update of BGIA Report 2/2008e of the same name. It describes the essential subject-matter of the standard in its third, revised 2015 edition, and explains its application with reference to numerous examples from the fields of electromechanics, fluidics, electronics and programmable electronics, including control systems employing mixed technologies. The standard is placed in its context of the essential safety requirements

Bookmark File PDF lec 82079 1

of the Machinery Directive, and possible methods for risk assessment are presented. Based upon this information, the report can be used to select the required Performance Level PLr for safety functions in control systems. The Performance Level PL which is actually attained is explained in detail. The requirements for attainment of the relevant Performance Level and its associated Categories, component reliability, levels of diagnostic coverage, software safety and measures for the prevention of systematic and common-cause failures are all discussed comprehensively. Background information is

Bookmark File PDF lec 82079 1

also provided on implementation of the requirements in real-case control systems. Numerous example circuits show, down to component level, how Performance Levels a to e can be engineered in the selected technologies with Categories B to 4. The examples provide information on the safety principles employed and on components with well-tried safety functionality. Numerous literature references permit closer study of the examples provided. The report shows how the requirements of EN ISO 13849-1 can be implemented in engineering practice, and thus makes a contribution to consistent
