This is a story of the pioneering of motor transport, beginning at Doncaster in Victoria delivering fruit in the 1940s. After World War 2, Ed Cameron and his brothers were the driving force began regular

deliveries of produce from Melbourne to Sydney. They formed the D&E Cameron transport company, to battle the primitive Hume Highway. Frustrated by the inadequacies of the available European and British trucks, Ed found the solution by importing the first Kenworths to Australia. It was through his efforts that Kenworth set up at Bayswater in Victoria, to produce trucks custom-built for Australian long-haul transport conditions. D&E Cameron ceased operations in the 1970s, but the name continues as Ed's son runs the very successful Glen Cameron Group, as one of Australia's leading transport operations. In this book, Ed Cameron tells the Kenworth story against the background of his family history, and the diversity of his interests following his life on the roads.

The recent debate over civil trials or military tribunals for suspected terrorists has focused public attention on the American court system. A cornerstone aspect to the federal courts is the grand jury, which investigates crimes against the United States and secures the constitutional right of grand jury indictment, two responsibilities needing broad powers. A US District Court summons a grand jury, so the jury's jurisdiction is geographically restricted by the court to which it is attached. The grand jury conducts its business in secret, but that independence does not often result in the dismissal of indictments. Although witnesses subpoenaed to appear before the grand jury are not often excused, they do benefit from several legal rights when testifying. This book presents a broad overview of the rules and background of the federal grand jury, a needed service for anyone wishing to understand the American system of justice and its potential use in the war on terror.
