The SAGE International Encyclopedia of Mass Media and Society discusses media around the world in their varied forms—newspapers, magazines, radio, television, film, books, music, websites, social media, mobile media—and describes the role of each in both mirroring and shaping society. This encyclopedia provides a thorough overview of media within social and cultural contexts, exploring the development of the mediated communication industry, mediated communication regulations, and societal interactions and effects. This reference work will look at issues such as free expression and government regulation of media; how people choose what media to watch, listen to, and read; and how the influence of those who control media organizations may be changing as new media empower previously unheard voices. The role of media in society will be explored from international, multidisciplinary perspectives via approximately 700 articles drawing on research from communication and media studies, sociology, anthropology, social psychology, politics, and business.

If Rupert Murdoch and Sumner Redstone are so smart, why are their stocks long-term losers? We live in the age of big Media, with the celebrity moguls telling us that "content is king." But for all the excitement, glamour, drama, and publicity they produce, why can't these moguls and their companies manage to deliver better returns than you'd get from closing your eyes and throwing a dart? The Curse of the Mogul lays bare the inexcusable financial performance beneath big Media's false veneer of power. By rigorously examining individual media businesses, the authors reveal the difference between judging a company by how many times its CEO is seen in SunValley and by whether it generates consistently superior profits. The book is packed with enough sharp-edged data to bring the most high-flying, hot-air filled mogul balloon crashing down to earth.
